

CORKSCREW

The Grand Cru corkscrew in two different designs - easy opening of wines.

Place the corkscrew over the bottle. Hold the neck of the bottle, pressing the tip easily against the cork and turn clockwise. Two rails keep the cork in place so that it can be easily removed from the corkscrew.

- ✓ The corkscrews are teflon coated so they slide more easily through the cork.
- ✓ The corkscrews pull the cork straight out preventing the cork from breaking.
- ✓ The Grand Cru corkscrews are designed in such a way that they complement the entire Grand Cru range.

The Grand Cru corkscrews are made from matt polished stainless steel and black plastic.

Product name:Corkscrew
Designer:Erik Bagger
Art. No.:5038
Length: (cm)18
